NEW QUESTION: 1 A. Option B B. Option D C. Option C D. Option A **Answer: D** Explanation: You can use the EAC to generate certificate requests that work with most certificate issuers. Note: To prevent clients from receiving errors regarding untrusted certificates, the certificate that's used by your Exchange server must be issued by someone that the client trusts. Although most clients can be configured to trust any certificate or certificate issuer, it's simpler to use a trusted third-party certificate on your Exchange server. This is because most clients already trust their root certificates. There are several third-party certificate issuers that offer certificates configured specifically for Exchange.
