**Explanation:** `aaa accounting { auth-proxy | system | network | exec | connection | commands level | dot1x } { default | list- name | guarantee-first } [ vrf vrf-name ] { start-stop | stop-only | none } [ broadcast ] { radius | group group-name } + stop-only: Sends a stop accounting record for all cases including authentication failures regardless of whether the aaa accounting send stop-record authentication failure command is configured. + stop-record: Generates stop records for a specified event. For minimal accounting, include the stop-only keyword to send a "stop" accounting record for all cases including authentication failures. For more accounting, you can include the start-stop keyword, so that RADIUS or TACACS+ sends a "start" accounting notice at the beginning of the requested process and a "stop" accounting notice at the end of the process. **NEW QUESTION: 3** Juror anonymity was unknown to American common law and jurisprudence in the country's first two centuries. Anonymity was first employed in federal prosecutions of organized crime in New York in the 1980's. Although anonymous juries are unusual since they are typically only empanelled in organized- crime cases, its use has spread more recently to widely publicized cases, such as the federal prosecution of police officers accused of beating Rodney King and the trial of those accused of the 1993 World Trade Center bombing. In these cases, attorneys selected a jury from a panel of prospective jurors whose names, addresses, ethnic backgrounds and religious affiliations remained unknown to either side. This unorthodox procedure, designed to protect jurors from outside influence and the fear of retaliation, has occasionally been employed in New York federal courts since the trial of drug kingpin Leroy "Nicky" Barnes. Despite apparent benefits, critics assail anonymous juries on the grounds that they are an infringement of the sixth amendment guarantee of an impartial jury and because they present a serious and unnecessary erosion of the presumption of innocence. Since many attorneys believe trials are frequently won or lost during jury selection, any procedure diminishing the role of counsel in the procedure necessitates close scrutiny and criticism. Opponents of anonymous juries argue that the procedure restricts meaningful voir dire, (questioning of the jury panel), and thereby undermines the defendant's sixth amendment

right to an impartial jury. Critics also claim that jurors interpret their anonymity as proof of the defendant's criminal proclivity, thereby subverting the presumption of innocence. However, consistent with due process and the sixth amendment, the trial judge may refuse to ask prospective jurors any questions not reasonably calculated to expose biases or prejudices relevant to the case. Although addresses and group affiliations may indicate significant potential for bias, attorneys do not have an unfettered right to this information in every circumstance. Denying access to these facts may indeed constrain an attorney's ability to assemble an ideal jury, but it violates no constitutional right. It can be inferred from the passage that a juror's ethnic background and religious affiliation **A**. Is considered by defendants to have a significant effect on the outcome of their trials **B**. Is considered by attorneys unlikely to have a significant effect on the verdict of a trial in a widely publicized case **C**. Is considered by defendants not to have a significant effect on the outcome of their trials **D**. Would be unlikely to have a significant effect on the verdict of a trial **E**. Is considered by attorneys likely to have a significant effect on the verdict of a trial **Answer: E** Explanation: Explanation/Reference: Explanation: The best answer is D. In paragraph three it states that many attorneys believe trials are frequently won or lost during jury selection. The passage gives no information on what defendant think about anonymous juries.
