How to pass Public-Sector-Solutions exam quickly and simply, SOFT is proper to all Windows systems and it is equipped with real examination style, We guarantee that you can download our products Public-Sector-Solutions exam questions immediately after payment is successful.

**NEW QUESTION: 1**When a user is forwarded to Avaya Aura® Messaging (AAM), Avaya Aura® Communication Manager (CM) needs to indicate to AAM who the call was originally destined for, so that the message is left in the correct mailbox.Which SIP header is used to indicate for whom the call was originally destined, and the reason for being forwarded to AAM?**A. To****B. B = history info****C. P-Asserted-Identity****D. Request****Answer: D**

**NEW QUESTION: 2**Which product should show that the project has been closed prematurely and has not achieved the objectives defined in the Project Initiation Documentation (PID)?**A. Project closure notification****B. Exception Report****C. End Project Report****D. Benefits Review Plan**  
**Answer: C**

**NEW QUESTION: 3**Your company releases new features with high frequency while demanding high application availability. As part of the application's A/B testing, logs from each updated Amazon EC2 instance of the application need to be analyzed in near real-time, to ensure that the application is working flawlessly after each deployment. If the logs show any anomalous behavior, then the application version of the instance is changed to a more stable one. Which of the following methods should you use for shipping and analyzing the logs in a highly available manner?**A. Ship the logs to Amazon CloudWatch Logs and use Amazon EMR to analyze the logs in a batch manner each hour.****B. Ship the logs to a large Amazon EC2 instance and analyze the logs in a live manner.****C. Ship the logs to an Amazon Kinesis stream and have the consumers analyze the logs in a live manner.****D. Ship the logs to Amazon S3 for durability and use Amazon EMR to analyze the logs in a batch manner each hour.****Answer: C**  
**Explanation:**  
Explanation - CYou can use Kinesis Streams for rapid and continuous data intake and aggregation. The type of data used includes IT infrastructure log data, application logs, social media, market data feeds, and web clickstream data. Because the response time for the data intake and processing is in real time, the processing is typically lightweight. The following are typical scenarios for using Kinesis Streams:  
\* Accelerated log and data feed intake and processing - You can have producers push data directly into a stream. For example, push system and application logs and they'll be available for processing in seconds. This prevents the log data from being lost if the front end or application server fails. Kinesis Streams provides accelerated data feed intake because you don't batch the data on the servers before you submit it for intake.  
\* Real-time metrics and reporting - You can use data collected into Kinesis Streams for simple

data analysis and reporting in real time. For example, your data-processing application can work on metrics and reporting for system and application logs as the data is streaming in, rather than wait to receive batches of data. For more information on Amazon Kinesis and SNS please refer to the below link:[\\* http://docs.aws.amazon.com/streams/latest/dev/introduction.html](http://docs.aws.amazon.com/streams/latest/dev/introduction.html)

**NEW QUESTION: 4**An EMC Avamar backup administrator is ready to add 12000 new DT/LT clients to his two 1x16+1 Avamar servers, and has asked you to recommend methods to add all clients as fast as possible.What advice do you give this administrator?**A.** The administrator will need to limit clients added to batches of 1000, to avoid overloading the two servers with all 12000 clients.**B.** The administrator should set up round-robin DNS between the two Avamar servers, to balance the load of 12000 clients.**C.** The administrator should add additional nodes to each Avamar server, to support 12000 clients.**D.** The administrator will need to limit the clients added to 10000, or add a 3rd Avamar server.**Answer: D**
