NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. The domain contains a domain controller named DC1 that runs Windows Server 2012. A user named User1 attempts to log on to DO, but receives the error message shown in the exhibit. (Click the Exhibit button.) You need to ensure that User1 can log on to DC1. What should you do?
A. Grant User1 the Allow log on locally user right.
B. Modify the Logon Workstations setting of the User1 account.
C. Add User1 to the Remote Management Users group.
D. Modify the Account is sensitive and cannot be delegated setting of the User1 account.
Answer: A
Explanation: Domain controllers, by default, restrict the types of user accounts that have the ability to log on locally. Domain controllers, by default, restrict the types of user accounts that have the ability to log on locally. By default, only members of the Account Operators, Administrators, Backup Operators, Print Operators, and Server Operators groups have the Allowed logon locally system right. If you want to grant a user account the ability to log on locally to a domain controller, you must either make that user a member of a group that already has the Allowed logon locally system right or grant the right to that user account. Edit Default Domain Controllers Policy Expand Computer Configuration, Policies, Windows Settings, Security Settings, Local Policies, click User Rights Assignment. Double-click Allow Logon Locally.

NEW QUESTION: 2A compensating balance:
A. Is a level of inventory held to compensate for variations in usage rate and lead time.
B. Compensates a financial institution for services rendered by providing it with deposits of funds.
C. Is the amount of prepaid interest on a loan.
D. Is used to compensate for possible losses on a marketable securities portfolio.
Answer: B
Explanation: Banks sometimes require a borrower to keep a certain percentage of the face amount of a loan in a noninterest-bearing checking account. This requirement raises the effective rate of interest paid by the borrower. This greater rate compensates a bank for services provided and results in greater profitability for the financial institution. Funds kept as a compensating balance can often be withdrawn if a certain average balance is maintained.
