Configure OSPF Interface Parameters Our OSPF implementation allows you to alter certain
interface-specific OSPF parameters, as needed. You are not required to alter any of these
parameters, but some interface parameters must be consistent across all routers in an
attached network. Those parameters are controlled by the ip ospf hello-interval, ip ospf
deadinterval, and ip ospf authentication-key commands. Therefore, be sure that if you do
configure any of these parameters, the configurations for all routers on your network have
compatible values. In interface configuration mode, use any of the following commands to
specify interface parameters as needed for your network: Reference
