NEW QUESTION: 1 You have an offline virtual hard disk (VHD) that contains a generalized installation of Windows 7 Ultimate. You need to disable the built-in games in the VHD. You must achieve this goal by using the minimum amount of administrative effort. What should you do? **A.** Start a computer from the VHD. Run Ocsetup.exe and specify the /uninstall parameter. Recapture the VHD. **B.** Start a computer from the VHD. From Programs and Features, turn off the Games feature and then recapture the VHD. **C.** Create an answer file that has InboxGames disabled. On a computer that runs Windows 7, attach the VHD. Run Pkgmgr.exe and specify the /uu parameter. **D.** Create an answer file that has InboxGames disabled. On a computer that runs Windows 7, attach the VHD. Run Dism.exe and specify the /apply-unattend parameter. **Answer: D**
Explanation: DismDeployment Image Servicing and Management (DISM) is a command-line tool used to service Windows images offline before deployment. You can use it to install, uninstall, configure, and update Windows features, packages, drivers, and international settings. Subsets of the DISM servicing commands are also available for servicing a running operating system. /Apply-Unattend Applies an unattend.xml file to an image. If you are updating device drivers using an unattended answer file, you must apply the answer file to an offline image and specify the settings in the offlineServicing configuration pass. If you are updating packages or other settings using an unattended answer file, you can apply the answer file to an offline or online image. Specify the settings in the offlineServicing configuration pass.

NEW QUESTION: 3 A Guardium administrator manages an environment containing four standalone Collectors. The administrator has been asked to provide a weekly report showing all Data Manipulation Language (DML) SQL statements performed by all database administrators on all databases. The administrator does not want to run the report on each Collector. What should the administrator do to simplify this task and run the report in only one place every week? **A.** Replace the 4 Collectors with one Aggregator. **B.** Install a Configuration Auditing System (CAS) on each Database Server. Configure the CAS Client to send data to a

Collector. Create and run the report on the Collector.**C.** Create an Enterprise Report on one Collector combining the data.**D.** Add a Guardium Aggregator to the environment. Create and run the report on the Aggregator.**Answer: D**Explanation:Explanation/Reference:Central Manager/Aggregator -The Central Manager is a single point of management for the entire IBM InfoSphere Guardium deployment. With the Central Manager, customers can define enterprise-wide policies, alerts, queries and reports, install patches, push configuration and perform a variety of other administrative tasks from a single console. In addition, data from multiple collectors can be aggregated to the Aggregation Server to provide holistic views and generate enterprise-level reports.Incorrect:Not D: CAS does not monitor DML SQL Statements. Databases can be affected by changes to the server environment; for example, by changing configuration files, environment or registry variables, or other database or operating system components, including executable files or scripts used by the database management system or the operating system. CAS tracks such changes and reports on them. The data is available on the Guardium system and can be used for reports and alerts.Reference: <http://www-01.ibm.com/support/docview.wss?uid=swg27039720>
