For this purpose we offer you to [ARA-R01 Reliable Exam Book](#) try free demo of our product, i opened up the book to read.

NEW QUESTION: 1 EBS 볼륨을 삭제하기 전에 나중에 볼륨을 다시 만들고 싶다면 어떻게 해야합니까? **A.** EC2 인스턴스로 콘텐츠 다운로드 **B.** 볼륨의 스냅 샷 저장 **C.** 데이터를 실제 디스크에 백업합니다. **D.** 스냅 샷이 아닌 EBS 볼륨의 복사본을 만듭니다. **Answer: B**

NEW QUESTION: 2 DRAG DROP **Answer:** Explanation: Explanation: Debug ip cef packet -> hardware routed packets Debug ip mpacket -> multicast packet Debug ip packet -> all ipv4 information Debug ipv6 packet -> all ipv6 information Debug standby errors -> hsrp issues Debug vlan packets -> 802.1Q traffic issue

NEW QUESTION: 3 You are testing an application that will allow users to scan the bar code from a package mailing label and then receive emails from the package shipper as the package moves through the various stages of its delivery (e.g., pickup, receipt at central processing, routing, delivery). If requested, the user can also receive a picture of the signature of the recipient of the package. This is the second version of this application. The first version was web browser-based and was quite slow to start up. The new version is a native application with all the same functionality. It is expected that this application will have wide usage across a large set of networks with varying speeds and reliability. Given this information, what would be the best approach for doing your testing to ensure the capabilities of the product are tested as well as the range of devices, environments and networks? **A.** Use a set of simulators that can simulate the various capabilities of a wide variety of devices. **B.** Use a remote device lab that is provided by a device manufacturer to ensure your application works across the whole family of devices. **C.** Use a cloud-based virtual test environment to simulate various devices and networks. **D.** Use crowd sourcing to get the widest distribution of device locations and types with minimal cost. **Answer: B** Explanation: Explanation A is correct. Because this is a native application, it needs to be tested on the devices that it is intended for. The question doesn't say how many different devices are supported, but for each supported device it makes sense to use the remote device lab that device manufacturers can supply. B is not correct because the focus needs to be on the device compatibility rather than the location distribution. C is not correct because a wide variety of devices is not needed. A good simulator for the family of devices supported might be a good alternative though. D is not correct because the testing across devices is not needed. Like C if D provides a good simulator of the right device family, it might be a realistic alternative, but that information is not supplied.

NEW QUESTION: 4

次のうちどれがリスク評価プロセス中にシステムとデータの重要度を分類するための最も効果的な方法ですか？**A.** 資産所有者にインタビューします。**B.** 理事会メンバーにインタビューします。**C.** データ管理者にインタビューします。**D.** 上級管理職にインタビューします。**Answer: A**
