**NEW QUESTION: 4** You need to recommend a solution for the planned deployment of the virtual machines for Customer1. What should you include in the recommendation?**A.** Create an Application profile that has a virtual application.**B.** Create an Application profile that has a script application.**C.** Create a Guest OS profile. Configure the Features settings.**D.** Create a Guest OS profile. Configure the [GUIRunOnce] Commands settings.**Answer: B**  
Explanation: Each deployment of a virtual machine for Customer1 must trigger the execution of a runbook by using the Orchestrator web service. The runbook must execute before any user account logs on to the virtual machine. We can create a "Post install" script in an application profile to trigger the runbook. Answer A is incorrect because the [GUIRunOnce] Commands run when the first user logs in. Reference:
