II. Senior management.  
III. Shareholders.

**NEW QUESTION: 2**You need to identify the current maximum bandwidth required for peer-to-peer (P2P) video calls to match business requirements. Which bandwidth should you choose?  
**A.** 759,760 Kbps  
**B.** 1,503,750 Kbps  
**C.** 303,750 Kbps  
**D.** 310,960 Kbps  
**Answer: C**  
Explanation: The company has 30 executives located across the offices. Company policy allows for all employees to have the option to use video conferencing. Employees will be limited to VGA video quality. Company executives will not have these limitations. All peer-to-peer (P2P) video sessions will support H.264 and RTVideo codecs  
VGA = 640x480 = 800kbps for H.264 and RTVideo.  
Execs using H.264 and RTVideo = 2500kbps  
5% of 7500 users = 375  
5% of 30 execs = 1.5  
 $(375 \times 800) + (1.5 \times 2500) = 303,750$

**NEW QUESTION: 4**When managing permissions for the API gateway, what can be used to ensure that the right level of permissions are given to developers, IT admins and users? These permissions should be easily managed. Please select:  
**A.** Use the AWS Config tool to manage the permissions for the different users  
**B.** Use IAM Access Keys to create sets of keys for the different types of users.  
**C.** Use IAM Policies to create different policies for the different types of users.  
**D.** Use the secure token service to manage the permissions for the different users  
**Answer: C**  
Explanation: Explanation The AWS Documentation mentions the following You control access to Amazon API Gateway with IAM permissions by controlling access to the following two API

Gateway component processes:\* To create, deploy, and manage an API in API Gateway, you must grant the API developer permissions to perform the required actions supported by the API management component of API Gateway.\* To call a deployed API or to refresh the API caching, you must grant the API caller permissions to perform required IAM actions supported by the API execution component of API Gateway. Option A, C and D are invalid because these cannot be used to control access to AWS services. This needs to be done via policies. For more information on permissions with the API gateway, please visit the following URL: <https://docs.aws.amazon.com/apigateway/latest/developerguide/permissions.html>The correct answer is: Use IAM Policies to create different policies for the different types of users.
