**NEW QUESTION: 1**You have standard Load balancer configured to support three virtual machines on the same subnet.You need to recommend a solution to notify administrators when the load balancer fails.Which metrics should you recommend using to test the load balancer? To answer, drag the appropriate metrics to the correct conditions. Each metric may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**NOTE:** Each correct selection is worth one point.**Answer:** Explanation: ExplanationBackend instance health: Health Probe StatusHealth Probe Status (DIP Availability): Standard Load Balancer uses a distributed health-probing service that monitors your application endpoint's health according to your configuration settings. This metric provides an aggregate or per-endpoint filtered view of each instance endpoint in the load balancer pool. You can see how Load Balancer views the health of your application, as indicated by your health probe configuration.Outbound port exhaustion: SNAT connection CountSNAT connections: Standard Load Balancer reports the number of outbound flows that are masqueraded to the Public IP address front end. Source network address translation (SNAT) ports are an exhaustible resource.This metric can give an indication of how heavily your application is relying on SNAT for outbound originated flows. Counters for successful and failed outbound SNAT flows are reported and can be used to troubleshoot and understand the health of your outbound flows.Reference:

**NEW QUESTION: 3** Switch Advisory is a small investment adviser partnership registered in a single state. A larger investment adviser firm, Bait Investment Adviser, is registered in the same state as well as two other states. Bait has offered to buy out three of Switch's partners who want to retire. This will give Bait a 60% ownership in Switch Advisory. Which of the following statements are true?  
I. Switch Advisory must obtain the approval of its clients before the partners can sell their interests to Bait.  
II. Switch Advisory must notify the state Administrator of this event.  
III. Switch Advisory must notify their clients of this event, but does not need the clients' approval.  
IV. Switch Advisory must notify the SEC of this event.  
**A.** II, III, and IV only  
**B.** I, II, and IV only  
**C.** I and II only  
**D.** I only  
**Answer: C**  
**Explanation:** Explanation/Reference: Explanation: Only Selections I and II are true. Switch must obtain the approval of its clients before the partners can sell their interests, and Switch must notify the state Administrator of this event. Whenever a change in partnership will result in new ownership of the business, which is the case when an external entity acquires a 60% interest, an investment adviser must get its clients' approval. As a state-registered investment adviser, switch also needs to notify the state Administrator. The SEC does not require notification since Switch is not a federal covered investment adviser.
