The comprehensive questions with the accurate answers [A00-282 Reliable Dumps Free](#) will help you have a good knowledge of the actual test and assist you pass with ease.

NEW QUESTION: 1You are developing an application to securely transfer data between on-premises file systems and Azure Blob storage. The application stores keys, secrets, and certificates in Azure Key Vault. The application uses the Azure Key Vault APIs.The application must allow recovery of an accidental deletion of the key vault or key vault objects. Key vault objects must be retained for 90 days after deletion.You need to protect the key vault and key vault objects.Which Azure Key Vault feature should you use? To answer, drag the appropriate features to the correct actions. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.NOTE: Each correct selection is worth one point.**Answer:** Explanation:ExplanationBox 1: Soft deleteWhen soft-delete is enabled, resources marked as deleted resources are retained for a specified period (90 days by default). The service further provides a mechanism for recovering the deleted object, essentially undoing the deletion.Box 2: Purge protectionPurge protection is an optional Key Vault behavior and is not enabled by default. Purge protection can only be enabled once soft-delete is enabled.When purge protection is on, a vault or an object in the deleted state cannot be purged until the retention period has passed. Soft-deleted vaults and objects can still be recovered, ensuring that the retention policy will be followed.Reference: <https://docs.microsoft.com/en-us/azure/key-vault/general/soft-delete-overview>

NEW QUESTION: 2A Windows 7 client computer named PC01 has intermittent performance issues.Each time a performance issue occurs, an associated event log entry is written to the Application event log.You need to ensure that a Windows 7 administrative computer named PC02 receives the event log entries from PC01.What should you do? (Choose all that apply.)**A.** Create a new event subscription on PC01.**B.** Run the winrmquickconfig command on PC01 only. Run the wecutil qc command on PC02.**C.** Add the PC02 computer account to the local Administrators group on PC01.**D.** Add the PC01 computer account to the local Administrators group on PC02.**E.** Run the winrmquickconfig command on PC01 and PC02. Run the wecutil qc command on PC02.**F.** Create a new event subscription on PC02.**Answer: B,C,F**

NEW QUESTION: 3Say that "abigcompany.com" had a security vulnerability in the javascript on their website in the past. They recently fixed the security vulnerability, but it had been there for many months. Is there some way to 4go back and see the code for that error?Select the best answer.**A.** Usenet**B.** Javascript would not be in their html so a service like usenet or archive wouldn't help youExplanations:Archive.org is a website that periodically archives internet content. They have archives of websites over many years. It could be used to go back and look at the javascript as javascript would be in the HTML code.**C.** There is no way to get the changed webpage unless you contact someone at the company**D.** archive.org**Answer: D**

NEW QUESTION: 4A stakeholder is reading project documents given by the project manager. The stakeholder is curious about the difference between a verified deliverable and an accepted

deliverable. Which of the following definitions can the project manager use to explain the difference?
A. An accepted deliverable has been checked and confirmed for accuracy through the Control Quality process; a verified deliverable meets acceptance criteria that is formally signed off and approved by the customer or sponsor.
B. An accepted deliverable meets acceptance criteria and is formally signed off and approved by the customer or sponsor a verified deliverable is a completed project deliverable that has been checked and confirmed for accuracy through the Control Quality process.
C. An accepted deliverable meets acceptance criteria and is signed off by the project manager; a verified deliverable meets acceptance criteria and is signed off by the customer or sponsor.
D. An accepted deliverable is approved by the project team; a verified deliverable is approved and formally signed off by the customer or sponsor.
Answer: C
