NEW QUESTION: 1Scenario: Global Traders Inc.Please read this scenario prior to answering the questionGlobal Traders is a large, global commodities trading company which has been growing rapidly through a series of acquisitions. Each new business is performing well in its markets. However, the lack of integration between headquarters and the business units has increasingly caused problems in the handling of customer and financial information. The inability to share information across businesses has resulted in lost opportunities to "leverage the synergies" that had been intended when the businesses were acquired. At present, each business unit maintains its own applications. Despite an earlier initiative to install a common application to manage customer, products, supplier, and inventory information, each business unit has different ways of defining each of these core elements and has customized the common application to the point where the ability to exchange information is difficult, costly, and error-prone.As a result, Global Traders has begun implementing a single Enterprise Resource Planning (ERP) system to consolidate information from several applications that exist across the lines of business. The Corporate Board is concerned that the new ERP system must be able to manage and safeguard customer information in a manner that meets or exceeds the legal requirements of the countries in which the company operates. This will be an increasingly important capability as the company expands its online services offered to clients and trading partners.The CIO has formed an Enterprise Architecture department, and one of the primary goals in its charter is to coordinate efforts between the ERP implementation team and the business unit personnel who will be involved in the migration process. The CIO has also formed a cross-functional Architecture Review Board to oversee and govern the architecture.After reviewing the available alternatives, and based on recommendations from the ERP vendor, Global Traders has selected TOGAF 9 as the basis for its Enterprise Architecture program. The CIO has endorsed this choice with the full support of top management.Refer to the Global Traders Inc. ScenarioYou are serving as the Chief Architect.As part of the process for establishing the Enterprise Architecture department, you have decided to create a set of principles to guide the activities.You have been asked to recommend the best approach for this work.Based on TOGAF 9, which of the following is the best answer?**A.** You examine the mission statements for Global Traders and each of its businesses, together with the corporate value statements. Based on that, you work with the Architecture Review Board to define the

principles. When developing the principles you ensure that they actively promote the alignment of IT with the Global Traders business strategies. You then run a series of reviews with all the relevant stakeholders, including senior management, ensuring their support.**B.** You define a set of principles that support the preferred best practices embodied in the Enterprise Architecture department charter. You publish the principles on the corporate intranet to ensure widespread acceptance and compliance. You then schedule regular periodic Compliance Assessments with individual business units to check that they have made satisfactory progress toward meeting the objectives and conditions embodied in the principles.**C.** You examine the mission statements for Global Traders and each of its businesses, together with the corporate value statements. Based on that, you define a set of principles and review with the CIO. When developing the principles you ensure that they actively promote the alignment of IT with the business strategies and initiatives of Global Traders. You then seek the endorsement of the CIO and senior management.**D.** You gather information from credible industry sources in the commodities business. Based on that, you assess current trends and apply that to defining a set of principles that embody best practices. You select architecture principles that do not conflict with each other and that should be stable. You ensure that all the principles are realistic and avoid including principles that are obvious.**Answer: A**

NEW QUESTION: 2Your SAP HANA usage scenario does not require SAP HANA XS.What do you have to consider before you remove the SAP HANA XS service from the configuration?There are 3 correct answers to this question.All applications using the SAP HANA instance must be stopped.**A.** A data backup must be taken after the SAP HANA XS service has been removed.**B.** The user privileges for accessing SAP HANA XS must be revoked.**C.** User <sid>adm is required to remove the SAP HANA XS service.**D.** The SAP HANA XS service must be removed from all hosts of the SAP HANA instance.**Answer: B,C,D**

NEW QUESTION: 3The decision table above shows a company's fuel expenses structure.Which of the following Test Cases based on the decision table are Valid?Test Case 1:An employee who is not a car or motorcycle driver attempts to claim fuel expenses. Expected result: Expense claim not allowed.Test Case 2:An employee who drives a 1700cc diesel car attempts to claim fuel expenses. Expected result: Expense claim accepted at band C.Test Case 3:An employee who rides a motorcycle attempts to claim fuel expenses. Expected result: Expense claim accepted at band A.**A.** Test Cases 2 and 3 are Valid, Test Case 1 is Invalid**B.** Test Cases 2 is Valid, Test Cases 1 and 3 are Invalid**C.** Test Cases 1, 2 and 3 are all Valid.**D.** Test Cases 1 and 3 are Valid, Test Case 2 is Invalid.**Answer: C**
