NEW QUESTION: 1First State Bank, a state nonmember institution, plans to purchase a company that would be a financial subsidiary of the bank. First State will send a notice to the FDIC of its proposed acquisition. Of the following factors, which one would NOT be relevant to the FDIC's consideration of the bank's acquisition?**A.** Whether First State Bank is well capitalized**B.** First State Bank's CRA rating**C.** First State Bank's asset size**D.** The impact of the acquisition on First State Bank's safety and soundness**Answer: C**

NEW QUESTION: 2Which of the following aspects of symmetric key encryption influenced the development of asymmetric encryption?**A.** Key distribution**B.** Volume of data**C.** Processing power**D.** Complexity of the algorithm**Answer: A****Explanation:**Symmetric key encryption requires that the keys be distributed. The larger the user group, the more challenging the key distribution. Symmetric key cryptosystems are generally less complicated and, therefore, use less processing power than asymmetric techniques, thus making it ideal for encrypting a large volume of data. The major disadvantage is the need to get the keys into the hands of those with whom you want to exchange data, particularly in e-commerce environments, where customers are unknown, untrusted entities.

NEW QUESTION: 3Company A submitted a bid on a contract to do work for Company B via email. Company B was insistent that the bid did not come from Company A. Which of the following would have assured that the bid was submitted by Company A?**A.** Digital Signatures**B.** Hashing**C.** Encryption**D.** Steganography**Answer: A****Explanation:**Section: Compliance and Operational Security**Explanation/Reference:****Explanation:**A digital signature is similar in function to a standard signature on a document. It validates the integrity of the message and the sender. The message is encrypted using the encryption system, and a second piece of information, the digital signature, is added to the message.
