You can download your purchases on the maximum of 2 (two) computers, To pass the AD0-E903 exam, careful planning and preparation are crucial to its realization.

If the clients have any problem about the use of our AD0-E903 exam practice materials and the refund issue they can contact our online customer service at any time, our online customer service personnel will reply them quickly.

**NEW QUESTION: 1**Nowadays, the security has become a particularly important issue in the network environment. Thus, Cisco Advanced Security Services is generated to provide a lot of related services. What do the base-level Mobility Service enablers consist of? Choose three from the following Cisco Advanced Security Services. (Select three.)**A.** authentication and encryption **B.** client identity discrimination**C.** intrusion detection and prevention**D.** firewall**Answer: A,C,D**

**NEW QUESTION: 2**You have a server named Server1 that runs Windows Server 2016. Server1 has the following IP configuration. You need to configure the default gateway on Server1 to allow for connectivity to other subnets via IPv6. Which command should you run? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation:References:  
<https://docs.microsoft.com/en-us/powershell/module/nettcpip/new-netroute?view=win10-ps>

**NEW QUESTION: 3**You need to implement a solution that meets the compliance requirements for the members of the legal department. Which two cmdlets should you use? (Each correct answer presents part of the solution. Choose two.)**A.** New-ManagementScope**B.** New-ManagementRole**C.** New-ManagementRoleAssignment**D.** New-RoleAssignmentPolicy**E.** Add-ManagementRoleEntry**Answer: B,C**Explanation: \* From scenario:/ Only the users in the legal department must be able to use eDiscovery to view the contents of email messages sent by the finance department users./ Users in the legal department use a shared mailbox named Legal. Legal is enabled for In-Place Hold. Legal is the only mailbox on DB2. We need to assign the role to the legal department users using the New-ManagementRoleAssignment cmdlet. To restrict the eDiscovery access to the finance users emails, we need to create a scope using the New-ManagementScope cmdlet. Topic 5, Proseware, IncOverview General OverviewProseware, Inc., is an international manufacturing company that has 1,000 users. Proseware has a sales

department, a marketing department, a research department, and a human resources department. Proseware purchases another company named Contoso, Ltd. Contoso has 500 users. Physical Locations Proseware has two main offices located in New York and London. The offices connect to each other by using a WAN link. Each office connects directly to the Internet. Contoso has a single office in Dallas. Existing Environment Active Directory Environment The Proseware network contains an Active Directory forest named `proseware.com`. The forest contains a single domain. All domain controllers run Windows Server 2012. Each office contains three domain controllers. Each office is configured as an Active Directory site. The Contoso network contains an Active Directory forest named `contoso.com`. The forest contains a single domain. All domain controllers run Windows Server 2012. Exchange Server Organization Proseware has an Exchange Server 2013 organization that contains four servers. The servers are configured as shown in the following table. EX3 and EX4 are the members of a database availability group (DAG) named DAG1. DAG1 has two DAG networks. The networks are configured as shown in the following table. Users connect to `mail.proseware.com` for Microsoft Outlook and Outlook Web App services. `Mail.proseware.com` resolves to an IP address on a hardware load balancer. All Outlook Anywhere users are enabled for Cached Exchange Mode. Proseware pilots a hybrid deployment of Exchange Server 2013 and Microsoft Office 365. The mailbox of each pilot user is moved to Office 365. For the pilot mailboxes, all inbound email messages from the Internet are delivered to the Exchange Server organization, and then forwarded to Office 365. Contoso has an Exchange Server 2010 organization. Problem Statements Proseware identifies the following issues:

- MapiNet is saturated with network traffic caused by the database replication between the members of DAG1 over MapiNet.
- The pilot users report that entries added to their Safe Senders list and their Blocked Senders list fail to work.
- A recent power outage in the New York office prevents all users from accessing their mailbox.
- A user named User1 reports that email messages are being sent from her mailbox without her consent.

Requirements Planned Changes Proseware plans to implement the following changes:

- Several users at Contoso will use a mailbox at Proseware as their primary mailbox. The Contoso users will use Autodiscover to configure their client settings and will use single sign-on.
- For a special project, an IT administrator will create 20 distribution groups that will each contain 200 members.
- Certain users in both companies will have a `contoso.com` SMTP suffix as their primary email address.

Technical Requirements Proseware identifies the following technical requirements for the Exchange Server organization:

- Internal email messages must be rejected if the messages cannot be protected by using Shadow Redundancy.
- All database replication between DAG1 members must occur over the ReplNet network.

Site Resiliency Requirements Proseware identifies the following site resiliency requirements for the Exchange Server organization:

- All mailboxes must be available if a single site becomes unavailable. The solution must not require administrator intervention.
- User traffic on the WAN links must be minimized.

Email Security Requirements Proseware identifies the following requirements for securing email messages:

- Email recipients must be able to identify whether an email message was modified during delivery.
- All email messages stored in the mailbox databases must be protected from theft.
- Users must be able to encrypt email messages from Outlook Web App.

Retention Requirements Proseware plans to reduce mailbox server storage usage and to limit company liability. Proseware identifies the following requirements:

- Email messages in the Deleted Items folder must be retained for only 30 days.
- Email messages in a mailbox folder named Projects must be retained for 540 days, unless the messages contain contractual information.
- Email messages in the Projects folder that contain contractual information must be retained indefinitely.
- All other email messages must be removed after one year.
