You can try our C_THR95_2311 free download study materials before you purchase, Payment and refund is easy by Credit Card, And we treat those comments with serious attitude to improve the level of our C_THR95_2311 practice questions even better.

Why Choose Photoexperienceacademy SAP C_THR95_2311 Exam Questions.

NEW QUESTION: 1VM1という名前のAzure仮想マシンとVault1という名前のRecovery Servicesコンテナがあります。展示に示されているように、バックアップPolicy1を作成します。
([展示]タブをクリックします。)

VM1のバックアップを構成して、1月1日木曜日にPolicy1を使用します。

VM1で使用可能な復旧ポイントの数を特定する必要があります。

1月8日と1月15日に利用できるリカバリポイントはいくつですか？回答するには、回答領域で適切なオプションを選択します。注：それぞれの正しい選択は1ポイントの価値があります。**Answer:**

Explanation:ExplanationBox 1: 64 daily + 1 weekly + monthlyBox 2: 84 daily + 2 weekly + monthly + yearly

NEW QUESTION: 2Your company deploys several Linux and Windows virtual machines (VMs) to Azure. The VMs are deployed with the Microsoft Dependency Agent and the Log Analytics Agent installed by using Azure VM extensions. On-premises connectivity has been enabled by using Azure ExpressRoute. You need to design a solution to monitor the VMs. Which Azure monitoring services should you use? To answer, select the appropriate Azure monitoring services in the answer area. NOTE: Each correct selection is worth one point. **Answer:** Explanation:Explanation Box 1: Azure Traffic Analytics Traffic Analytics is a cloud-based solution that provides visibility into user and application activity in cloud networks. Traffic analytics analyzes Network Watcher network security group (NSG) flow logs to provide insights into traffic flow in your Azure cloud. With traffic analytics, you can: * Identify security threats to, and secure your network, with information such as open-ports, applications attempting internet access, and virtual machines (VM) connecting to rogue networks. * Visualize network activity across your Azure subscriptions and identify hot spots. * Understand traffic flow patterns across Azure regions and the internet to optimize your network deployment for performance and capacity. * Pinpoint network misconfigurations leading to failed connections in your network. Box 2: Azure Service Map Service Map automatically discovers application components on Windows and Linux systems and maps the communication between services. With Service Map, you can view your servers in the way that you think of them: as interconnected systems that deliver critical services. Service

Map shows connections between servers, processes, inbound and outbound connection latency, and ports across any TCP-connected architecture, with no configuration required other than the installation of an agent. References:

<https://docs.microsoft.com/en-us/azure/network-watcher/traffic-analytics>

<https://docs.microsoft.com/en-us/azure/azure-monitor/insights/service-map>

NEW QUESTION: 3 An administrator has a large boot from SAN cluster and wants to ensure consistent configuration by using host profiles. What special considerations are required for boot from SAN hosts?
A. Host profiles are incompatible with boot from SAN hosts.
B. Verify that the boot LUN is correctly identified as the boot device in the host profile.
C. Change the "Device is shared clusterwide" setting to "false" in the host profile.
D. The boot from SAN device must report as a local device.
Answer: B

NEW QUESTION: 4 Refer to the exhibit diagram and configuration. RTB is summarizing its networks from AS 64100 with the aggregate-address command. However, the show ip route command on RTA reveals the RTB individual networks as well as its summary route. Which option would ensure that only the summary route would appear in the routing table of RTA?
A. Add a static route with a prefix of 192.168.24.0 255.255.252.0 pointing to the null0 interface.
B. Create a route map permitting only the summary address.
C. Add the keyword summary-only to the aggregate-address command.
D. Delete the four network statements and leave only the aggregate-address statement in the BGP configuration.
Answer: C
Explanation: When the aggregate-address command is used within BGP routing, the aggregated address is advertised, along with the more specific routes. The exception to this rule is through the use of the summary-only command. The "summary-only" keyword suppresses the more specific routes and announces only the summarized route.
