NEW QUESTION: 1Your company has a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com. The company stores 2 TBs of data in SharePoint Online document libraries. The tenant has the labels shown in the following table.

Answer: Explanation:Explanation

NEW QUESTION: 2DRAG DROPYou need to recommend a monitoring solution for Proseware. Which three actions should you recommend performing in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation:

NEW QUESTION: 3Rachel, a nurse, can write progress notes in the patient's electronic health record. Vera, a cod can view the progress notes but is not authorized to write a progress note. What controls this?**A.** biometrics**B.** based access control**C.** authentication**D.** two-factor authentications**Answer: B**

NEW QUESTION: 4Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in the series.You have a database named Sales that contains the following database tables. Customer, Order, and Products.The Products table and the order table shown in the following diagram.The Customer table includes a column that stores the date for the last order that the customer placed.You plan to create a table named Leads. The Leads table is expected to contain approximately 20,000 records.Storage requirements for the Leads table must be minimized.You need to begin to modify the table design to adhere to third normal form.Which column should you remove for each table? To answer? drag the appropriate column names to the correct locations. Each column name may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer: Explanation:ExplanationIn the Products table the SupplierName is dependent on the SupplierID, not on the ProductID.In the Orders table the ProductName is dependent on the ProductID, not on the OrderID.Note:A table is in third normal form when the following conditions are met:* It is in second normal form.* All non-primary fields are dependent on the

primary key. Second normal form states that it should meet all the rules for First Normal Form and there must be no partial dependencies of any of the columns on the primary key. First normal form (1NF) sets the very basic rules for an organized database: * Define the data items required, because they become the columns in a table. Place related data items in a table. * Ensure that there are no repeating groups of data. * Ensure that there is a primary key. References: <https://www.tutorialspoint.com/sql/third-normal-form.htm>
