NEW QUESTION: 3 DRAG DROP You administer 50 laptops that run Windows 7 Professional 32-bit. You want to install Windows 10 Enterprise 64-bit on every laptop. Users will keep their own laptops. You need to ensure that user application settings, Windows settings, and user files are maintained after Windows 10 Enterprise is installed. Which four actions should you perform in sequence?**Answer:** Explanation: Explanation: Box 1: First we copy the User State Migration Tool to the source computer. Box 2: Scanstate with /nocompress The ScanState command is used with the User State Migration Tool (USMT) 5.0 to scan the source computer, collect the files and settings, and create a store. We use the /nocompress option as the only available loadstate option, in step 4, uses /nocompress. Box 3: Delete old partitions, and install windows 8 on a new partition. After you create a migration store on a server, you will install Windows 8 and load the files and settings from that migration store onto the destination computer. You can reformat the source computer (PC refresh) and use it as your destination computer, or you can use an additional computer (PC replacement). Box 4: Loadstate To apply migrated data to your hard drives, you connect the computer to your network, install USMT (this step is missing in this question), and then run LoadState.
