NEW QUESTION: 3 What is the purpose of Route Target Constraint? **A.** to avoid using multiple route distinguishers per VPN in MPLS VPN networks **B.** to avoid using route reflectors in MPLS VPN networks **C.** to avoid sending unnecessary BGP VPNv4 or VPNv6 updates to the PE router **D.** to avoid BGP having to perform route refreshes **E.** to be able to implement VPLS with BGP signaling **Answer: C** Explanation: Some service providers have a very large number of routing updates being sent from RRs to PEs, using considerable resources. A PE does not need routing updates for VRFs that are not on the PE; therefore, the PE determines that many routing updates it receives are "unwanted." The PE can filter out the unwanted updates using Route Target Constraint. Reference:
