NEW QUESTION: 1 Which of the following statements about a certification authority (CA) is true?
A. It is a trusted third-party organization that issues digital certificates to create digital signatures and public key pairs.
B. It is a non-profit organization that sets security standards for e-commerce.
C. It is a business-to-consumer (B2C) commerce model that is used for high-volume transactions.
D. It issues physical certificates that confirm the identity of entities.

Answer: A

NEW QUESTION: 2 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your network contains an Active Directory domain named adatum.com. The domain contains two DHCP servers named Server1 and Server2. Server1 has the following IP configuration. Server2 has the following IP configuration. Some users report that sometimes they cannot access the network because of conflicting IP addresses. You need to configure DHCP to avoid leasing addresses that are in use already. Solution: On Server1, you modify the ActivatePolicies setting of the scope. Does this meet the goal?
A. Yes
B. No
Answer: B

NEW QUESTION: 3 At 9:00 am each morning, all of the virtual desktops in a VDI implementation become extremely slow and/or unresponsive. The outage lasts for around 10 minutes, after which everything runs properly again. The administrator has traced the problem to a lab of thin clients that are all booted at 9:00 am each morning. Which of the following is the MOST likely cause of the problem and the BEST solution? (Select TWO).
A. The lab desktops are saturating the network while booting.
B. Add guests with more memory to increase capacity of the infrastructure.
C. A backup is running on the thin clients at 9am every morning.
D. Install more memory in the thin clients to handle the increased load while booting.
E. Booting all the lab desktops at the same time is creating excessive I/O.
F. The lab desktops are using more memory than is available to the host systems.
G. Install 10-Gb uplinks between the hosts and the lab to increase network capacity.
H. Install faster SSD drives in the storage system used in the infrastructure.
Answer: E, H Explanation: The problem lasts for 10 minutes at 9am every day and has been traced to the lab desktops. This question is asking for the MOST likely cause of the problem. The most likely cause of the problem is that the lab desktops being started at the same time at the beginning of the day is causing excessive disk I/O as the operating systems are being read and loaded from disk storage. The solution is to install faster SSD drives in the storage system that contains the desktop operating systems.
