As for the virtual online product, the H19-431_V1.0 braindumps' update is a critical factor.

NEW QUESTION: 1When APIC is down on cluster device ... What is the minimum number of APICs requirement for a production ACI Fabric to continue to operate?**A. 0B. 1C. 2D. 3****Answer: C**
Explanation:From Designing for Cisco Network Service Architecture Fourth Edition:The recommended minimum sizing has the following requirements:* Three or more Cisco APIC controllers that are dual connected to different leaf switches for maximum resilience. Note that the fabric is manageable even with just one controller and operational without a controller.I'm not sure what 'manageable' means, is it still an ACI fabric or does it revert to a different state. It seems weird to me you would no longer have your ACI fabric if one/ two of your three APIC's went offline. Not usually how redundancy works.This Cisco topic seems to indicate it will still work on 1 APIC

<https://supportforums.cisco.com/discussion/12448836/apic-cluster-why-minimum-3-controllers> Interesting your reasoning. "Manageable", means that you can still make changes, add/remove things, etc.So, now reading your comments, it makes sense that if the is talking about continuing to operate, the answer must be 1. I've seen 3 as the answer in all dumps but now I doubt it.

NEW QUESTION: 2In which management task would you collect and analyze ISL traffic metrics?**A. PerformanceB. AvailabilityC. HealthD. Security****Answer: A**

NEW QUESTION: 3Which command-line option can be invoked within VPLEXcli as a task to recognize and use new LUNs provisioned to a cluster?**A. storage-volume claimB. storage-volume discoverC. storage-volume find-arrayD. storage-volume resurrect****Answer: A**
