Related Posts=,|,II,110 run;What changes should be made to the KEEP statement to correct the errors in the LOG?**A.** keep = (product sales);**B.** keep = product, sales;**C.** keep product sales;**D.** keep product, sales;**Answer: C**

NEW QUESTION: 2 Which of the following would be considered an example of insufficient due diligence leading to security or operational problems when moving to a cloud?**A.** Monitoring**B.** Programming languages used**C.** Reliance on physical network controls**D.** Use of a remote key management system**Answer: C**Explanation:ExplanationMany organizations in a traditional data center make heavy use of physical network controls for security.Although this is a perfectly acceptable best practice in a traditional data center, this reliance is not something that will port to a cloud environment. The failure of an organization to properly understand and adapt to the difference in network controls when moving to a cloud will likely leave an application with security holes and vulnerabilities. The use of a remote key management system, monitoring, or certain programming languages would not constitute insufficient due diligence by itself.

NEW QUESTION: 3 ScenarioYour organization has just implemented a Cisco AnyConnect SSL VPN solution. Using Cisco ASDM, answer the questions regarding the implementation.Note: Not all screens or option selections are active for this exercise.TopologyDefault_HomeWhat two actions will be taken on translated packets when the AnyConnect users connect to the ASA? (Choose two.)**A.** The source NAT type will be a static translation**B.** The source address will use the outside-nat-pool**C.** The source NAT type will be a dynamic translation**D.** DNS will be translated on rule matches**E.** No action will be taken, they will keep their original assigned addresses**Answer: A,E**Explanation:ExplanationFirst, navigate to the Configuration ->NAT Rules tab to see this:Here we see that NAT rule 2 applies to the AnyConnect clients, click on this rule

for more details to see the following:Here we see that it is a static source NAT entry, but that the Source and Destination addresses remain the original IP address so they are not translated.
