**NEW QUESTION: 1**An insurance company has two million customers and is researching the top transactions on its customer portal. It identifies that the top transaction is currently password reset. Due to users not remembering their secret questions, a large number of calls are consequently routed to the contact center for manual password resets. The business wants to develop a mobile application to improve customer engagement in the future, continue with a single factor of authentication, minimize management overhead of the solution, remove passwords, and eliminate to the contact center. Which of the following techniques would BEST meet the requirements? (Choose two.)**A.** Certificate sent to be installed on a device**B.** Customer ID sent via push notification**C.** Third-party social login**D.** Magic link sent to an email address**E.** SMS with OTP sent to a mobile number**F.** Hardware tokens sent to customers**Answer: A,E**  
Explanation:Section: (none)

**NEW QUESTION: 2**Refer to the exhibit.Assuming that the administrator has never performed any manual custom uploads, which two file types can be found when you choose Software Upgrades, followed by TFTP File Management on the Cisco Unified Operating System Administration web page? (Choose two.)**A.** sample music-on-hold audio files**B.** softkey template files**C.** IP phone license files**D.** Mobile Voice Access audio files**E.** Identity Trust List files**F.** IP phone configuration files**Answer: D,E**Explanation:Explanation/Reference:Explanation: We get option for Identity Trust list Files and Mobile Voice Access audio files.

**NEW QUESTION: 3**Which type of management tasks can be completed on a Cisco WLC remotely from a wireless client?**A.** All management and configuration tasks, except uploads from and downloads to the Cisco WLC, are permitted.**B.** The default configuration of the Cisco WLC allows only CLI access and then only the use of show commands, so no configuration is possible.**C.** In the default configuration, no management or configuration is possible through the GUI or CLI on the Cisco WLC.**D.** All management and configuration tasks can be performed from a wireless client except for using debug commands.**Answer: C**Explanation:You can use either the service port interface or the management interface to access the GUI.Cisco recommends that you use the service-port interface. GUI access is not available from a wireless client.You access the controller CLI using one of two methods:A direct serial connection to the controller console portA remote console session over Ethernet through the pre-configured

service port or the distribution system ports. CLI access from a remote client is not allowed.
