We are concentrating on the reform on the CIS-SP exam material that our candidates try to get aid with, Buy ServiceNOW Certified Implementation Specialist - Service Provide sure pass training amazing after service for you.

**NEW QUESTION: 1** Failure in which of the following testing stages would have the GREATEST impact on the implementation of new application software?**A.** Unit testing**B.** Acceptance testing**C.** Integration testing**D.** System testing**Answer: B****Explanation:** Acceptance testing is the final stage before the software is installed and is available for use. The greatest impact would occur if the software fails at the acceptance testing level, as this could result in delays and cost overruns. System testing is undertaken by the developer team to determine if the software meets user requirements per specifications. Integration testing examines the units/modules as one integrated system and unit testing examines the individual units or components of the software. System, integration and unit testing are all performed by the developers at various stages of development; the impact of failure is comparatively less for each than failure at the acceptance testing stage.

**NEW QUESTION: 2** Was ist die höchste Berichtsebene im Management Accounting?**A.** Betriebsbedenken**B.** Kontrollbereich**C.** Profit Center**D.** Buchungskreis**Answer: A**

**NEW QUESTION: 3** How do you validate that you can use your developer keys to send authenticated message requests to the web services?**A.** Use the ID Types REST API.**B.** Use the ID Types REST API. **C.** Use the Ping API.**D.** Use the Audience Grant API.**Answer: D**

**NEW QUESTION: 4** You plan to migrate a Microsoft sql server instance between physical servers. You must migrate the metadata associated with the database instance. You need to ensure that the new instance retains the existing jobs and alerts. Solutions: You restore the model database. Does the solution meet the goal?**A.** No**B.** Yes**Answer: A****Explanation:** Explanation The model database does not handle alerts and jobs. It is used as the template for all databases created on an instance of SQL Server. The msdb database is used by SQL Server Agent for scheduling alerts and jobs and by other features such as SQL Server Management Studio, Service Broker and Database Mail.
