You can ask any questions about Cisco 500-220 exam practice torrent.

NEW QUESTION: 1A. Option AB. Option CC. Option ED. Option DE. Option FF. Option B
Answer: A,C,D

NEW QUESTION: 2A network technician is setting up a wireless access point that would only allow a certain laptop to be able to access the WAP. By using ACL, which of the following would be filtered to ensure only the authorized laptop can access the WAP?**A. NetBIOS name filtering**
B. Computer name filtering**C. IP address filtering****D. MAC address filtering****Answer: D**
Explanation:MAC Filtering (or EUI filtering, or layer 2 address filtering) refers to a security access control method whereby the 48-bit address assigned to each network card is used to determine access to the network.MAC addresses are uniquely assigned to each card, so using MAC filtering on a network permits and denies network access to specific devices through the use of blacklists and whitelists. While the restriction of network access through the use of lists is straightforward, an individual person is not identified by a MAC address, rather a device only, so an authorized person will need to have a whitelist entry for each device that he or she would use to access the network.

NEW QUESTION: 3Which technology is used to perform predictive accounting for sales orders in SAP S/4HANA Cloud?**A. Extension ledger****B. Smart contracts****C. Machine learning****D. Distributed ledger****Answer: A**

NEW QUESTION: 4RSE supports two video formats (HD/SD) for live/on-demand streaming of a conference and can automatically adapt endpoint's bandwidth and capability.**A. TRUE****B. FALSE**
Answer: A
