NEW QUESTION: 1The Hill Health Plan designed a set of benefits that it packaged in the form of a PPO product. Hill then established a pricing structure that allowed its product to compete in the small group market, and it developed advertising designed to inform potentialA. \$140B. \$180C. \$170D. \$210**Answer: C**

NEW QUESTION: 2A user has unknowingly gone to a fraudulent site. The security analyst notices the following system change on the user's host:Old `hosts' file:127.0.0.1 localhostNew `hosts' file:127.0.0.1 localhost5.5.5.5 www.comptia.comWhich of the following attacks has taken place?A. VishingB. Spear phishingC. PhishingD. Pharming**Answer: D****Explanation:**Section: Threats and Vulnerabilities**Explanation/Reference:****Explanation:**We can see in this question that a fraudulent entry has been added to the user's hosts file. This will point the URL: www.comptia.com to 5.5.5.5 instead of the correct IP address. Similar in nature to e-mail phishing, pharming seeks to obtain personal or private (usually financial related) information through domain spoofing. Rather than being spammed with malicious and mischievous e-mail requests for you to visit spoof Websites which appear legitimate, pharming 'poisons' a DNS server (or hosts file) by infusing false information into the DNS server, resulting in a user's request being redirected elsewhere. Your browser, however will show you are at the correct Website, which makes pharming a bit more serious and more difficult to detect. Phishing attempts to scam people one at a time with an e-mail while pharming allows the scammers to target large groups of people at one time through domain spoofing.

NEW QUESTION: 3How can you identify often-used SQL statements? Note: 2 correct answersA. Create an SQL query on the view SYS.M_SQL_PLAN_CACHEB. Create an SQL query on the view SYS.M_CONNECTION_STATISTICSC. Review the Sessions subtab in the Performance tab of the SAP HANA studio Administration editorD. Review the SQL Plan Cache subtab in the Performance tab of the SAP HANA studio Administration editor**Answer: A,D**

NEW QUESTION: 4Refer to the exhibit.A network administrator configures a new router and enters the copy startup-config running-config command on the router. The network administrator powers down the router and sets it up at a remote location. When the router starts, it enters the system configuration dialog as shown. What is the cause of the problem?A. The network administrator failed to save the configuration.B. The configuration register is set to 0x2102.C. The router is configured with the boot system startup command.D. The boot

system flash command is missing from the configuration. **E.** The configuration register is set to 0x2100. **Answer: A** Explanation: Explanation The "System Configuration Dialog" appears only when no startup configuration file is found. The network administrator has made a mistake because the command "copy startup-config running-config" will copy the startup config (which is empty) over the running config (which is configured by the administrator). So everything configured was deleted. Note: We can tell the router to ignore the start-up configuration on the next reload by setting the register to 0x2142. This will make the "System Configuration Dialog" appear at the next reload.
