NEW QUESTION: 1 DRAG DROP You are troubleshooting the problems with viewing scanned contracts. You need to select the appropriate Performance Monitor counters to use. Which performance counters should you use? (To answer, drag the appropriate counters to the correct location or locations in the answer area. Each counter may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
Select and Place:
Answer: Explanation: Explanation/Reference: Note: * From scenario: Scanned contracts are stored in binary large object (BLOB) cache storage. The BLOB cache is routinely filling up. End users are reporting poor performance when viewing scanned contracts. * Symptoms: The Blob Cache fill ratio performance counter threshold has been exceeded. Cause: The configured size for the disk-based cache is smaller than the total size of frequently accessed files for the Web application. * Total Number of cache Compactions: If this number is continually or frequently high, the cache size is too small for the data being requested. To improve performance, increase the size of the cache. Reference: Monitor cache performance in SharePoint 2013
