A. Conduct frequent awareness training with noncompliance penalties**B.** Disable universal serial bus (USB) ports on all desktop devices**C.** Establish strict access controls to sensitive information**D.** Restrict the available drive allocation on all PCs
Answer: D
Explanation: Restricting the ability of a PC to allocate new drive letters ensures that universal serial bus (USB) drives or even CD-writers cannot be attached as they would not be recognized by the operating system. Disabling USB ports on all machines is not practical since mice and other peripherals depend on these connections. Awareness training and sanctions do not prevent copying of information nor do access controls.
