**NEW QUESTION: 1** Which of the following should an IS auditor use to detect duplicate invoice records within an invoice master file?  
**A.** Integrated test facility (ITF) **B.** Attribute sampling **C.** Test data **D.** Generalized audit software (GAS)  
**Answer: D**  
**Explanation:** Explanation/Reference: Explanation: Generalized audit software (GAS) would enable the auditor to review the entire invoice file to look for those items that meet the selection criteria. Attribute sampling would aid in identifying records meeting specific conditions, but would not compare one record to another to identify duplicates. To detect duplicate invoice records the IS auditor should check all of the items that meet the criteria and not just a sample of the items. Test data are used to verify program processing, but will not identify duplicate records. An integrated test facility (ITF) allows the IS auditor to test transactions through the production system, but would not compare records to identify duplicates.
