NEW QUESTION: 1To drive sales, what is important for a sales professional to know?**A.** Ask how many staff bring their own devices to work to upsell mobile accessories.**B.** Find out what their future printer, laptop, and interconnect strategy is.**C.** Understand the customers' needs and what drives their purchasing decision.**D.** Determine how much the customer has to spend on their thin client purchase.**Answer: C**Explanation:Explanation/Reference:

NEW QUESTION: 2PowerVM Enterprise

Editionのどの機能が本番ワークロードの可用性を向上させますか？**A.**

アクティブメモリの重複排除**B.** ライブパーティションモビリティ**C.** 仮想プロセッサ**D.**

アクティブメモリミラーリング**Answer: B**

NEW QUESTION: 3Refer to the exhibit.Which two options are possible states for the interface configured with the given OSPFv3 authentication? (Choose two.)**A.** DOWN**B.** GOING UP**C.** UNCONFIGURED**D.** GOING DOWN**Answer: A,B**Explanation:To configure IPsec, you configure a security policy, which is a combination of the security policy index (SPI) and the key (the key is used to create and validate the hash value). IPsec for OSPFv3 can be configured on an interface or on an OSPFv3 area. For higher security, you should configure a different policy on each interface configured with IPsec. If you configure IPsec for an OSPFv3 area, the policy is applied to all of the interfaces in that area, except for the interfaces that have IPsec configured directly. Once IPsec is configured for OSPFv3, IPsec is invisible to you. The secure socket API is used by applications to secure traffic. The API needs to allow the application to open, listen, and close secure sockets. The binding between the application and the secure socket layer also allows the secure socket layer to inform the application of changes to the socket, such as connection open and close events. The secure socket API is able to identify the socket; that is, it can identify the local and remote addresses, masks, ports, and protocol that carry the traffic requiring security. Each interface has a secure socket state, which can be one of the following: OSPFv3 will not send or accept packets while in the DOWN state.Reference:
