NEW QUESTION: 2You need implement tools at the client's location for monitoring and deploying Azure resources.Which tools should you use? To answer, select the appropriate on-premises tool for each task in the answer area.**Answer:** Explanation:Explanation* System Center Virtual Machine Manager (SCVMM) enables rapid provisioning of new virtual machines by the administrator and end users using a self-service provisioning tool.* System Center Operations Manager (SCOM) is a cross-platform data center management system for operating systems and hypervisors. It uses a single interface that shows state, health and performance information of computer systems. It also provides alerts generated according to some availability, performance, configuration or security situation being identified.The basic idea is to place a piece of software, an agent, on the computer to be monitored. The agent watches several sources on that computer, including the Windows Event Log, for specific events or alerts generated by the applications executing on the monitored computer.* Scenario:Leverage familiarity with Microsoft server management tools.Manage hosted resources by using on-premises tools.Mitigate the need to purchase additional tools for monitoring and debugging.Use advanced monitoring features and reports of workloads in Azure by using existing Microsoft tools.References:
