NEW QUESTION: 1 Is the following statement true or false? When a printer is installed on a network, default printer permissions are assigned that allow all users to print and change the status of documents sent to it. **A. True B. False**
Answer: B
Explanation: Initial answer = true => false the key is all users and change the status of documents. Change the status document refers to the "Manage Document" permission and it's not a default permission for "all users". by default, so far, a user can only modify status of the jobs that he initiated himself. but i tested to make sure. i installed 2 fake printers (one by the network, and one using LPT1) and here's the default permissions i have got: If we consider that Everyone can be used to designate "all users", the above screenshot is enough. but just to be sure, i'll add the "Domain Users" and "Authenticated Users" groups to the permissions to check which permission are assigned by default: exactly the same: only the permission to print documents: Now we can be sure the answer is "FALSE". NB: by default, only Administrators (and administrator) and "All Application Packages" have both permissions (print & manage documents)
<http://technet.microsoft.com/en-us/library/cc773372%28v=ws.10%29.aspx> Assigning printer permissions
When a printer is installed on a network, default printer permissions are assigned that allow all users to print, and allow select groups to manage the printer, the documents sent to it, or both. Because the printer is available to all users on the network, you might want to limit access for some users by assigning specific printer permissions. For example, you could give all nonadministrative users in a department the Print permission and give all managers the Print and Manage Documents permissions. In this way, all users and managers can print documents, but managers can also change the print status of any document sent to the printer.

NEW QUESTION: 2 Scenario: A Citrix Administrator has a current StoreFront store that supports 150 users who have full access to all enterprise resources. The administrator needs to create a new StoreFront store for contractors who will work onsite for two months. The contractors need access to specific resources but will NOT be Active Directory users. Which option should the administrator select while creating the Store for contractors? **A. SmartCard B. Unauthenticated C. HTTP Basic D. Pass-through**
Answer: B

NEW QUESTION: 3 Your customer has asked you to recommend a Wi-Fi solution that includes the following features: 1. Role Based Access Control 2. Stateful Firewall 3. Quality of Service What device type can perform all of these functions? **A. Wireless Intrusion Prevention System (WIPS) B. Wireless Network Management System (WNMS) C. Wireless LAN Controller D. Wireless**

Workgroup Bridge **Answer: C**
