And you will be bound to pass the exam with our C\_ARCIG\_2404 learning guide, In addition, C\_ARCIG\_2404 exam dumps is convenient and easy to study, it supports all web browsers and Android and iOS etc.

**NEW QUESTION: 1**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.You have an on-premises Active Directory forest.You deploy Active Directory Federation Services (AD FS) and purchase an Office 365 subscription.You need to create a trust between the AD FS servers and the Office 365 subscription.Solution: You run the New-MSolFederatedDomain cmdlet.Does this meet the goal?**A. No****B. Yes****Answer: B**  
Explanation:Explanation/Reference:Explanation:Each domain that you want to federate must either be added as a single sign-on domain or converted to be a single sign-on domain from a standard domain. Adding or converting a domain sets up a trust between AD FS and Microsoft Azure Active Directory (Microsoft Azure AD).Note: The New-MSOLFederatedDomain cmdlet adds a new single sign-on domain (also known as identity- federated domain) to and configures the relying party trust settings between the on-premises AD FS server. Due to domain verification requirements, you may need to run this cmdlet several times in order to complete the process of adding the new single sign-on domain.References:
