Smooth operation.

**NEW QUESTION: 1** Pedro wants to register 130 new users on the IBM Domino server. Juan has recommended that he should create a User Registration policy. Which statement given by Juan is true with regard to creating a User Registration policy?  
**A.** A User Registration policy will allow Pedro to standardize common options across new users such as internet domain and email address format.  
**B.** A User Registration policy limits Pedro to only four common options in order to get a new user registered.  
**C.** A User Registration policy will significantly increase the time Pedro spends registering new users.  
**D.** A User Registration policy will not allow Pedro to set common options to be used while registering a new user within Domino.  
**Answer: A**  
Explanation: Explanation/Reference: Explanation:

**NEW QUESTION: 2** Your network contains an Active Directory domain named contoso.com. The domain contains more than 100 Group Policy objects (GPOs). Currently, there are no enforced GPOs. You need to provide an Administrator named Admin1 with the ability to create GPOs in the domain. The solution must not provide Admin1 with the ability to link GPOs. What should you use?  
**A.** Add-ADGroupMember  
**B.** Gptedit.msc  
**C.** Gpupdate  
**D.** Gpresult  
**E.** Import-GPO  
**F.** Get-GPOReport  
**G.** Set-GPInheritance  
**H.** dcgppofix  
**I.** Restore-GPO  
**J.** Set-GPPermission  
**K.** Gpfixup  
**L.** Set-GPLink  
**Answer: J**  
Explanation: Set-GPPermissions - Grants a level of permissions to a security principal for one GPO or all the GPOs in a domain. Grants a level of permissions to a security principal (user, security group, or computer) for one GPO or all the GPOs in a domain. You use the TargetName and TargetType parameters to specify a user, security group, or computer for which to set the permission level. You can use the Name or the Guid parameter to

set the permission level for the security principal on a single GPO, or you can use the All parameter to set the permission level for the security principal on all GPOs in the domain. By default, if the security principal already has a higher permission level than the specified permission level, the change is not applied. You can specify the Replace parameter, to remove the existing permission level from the GPO before the new permission level is set. This ensures that the existing permission level is replaced by the new permission level.
