NEW QUESTION: 1 Refer to the exhibit. The "level_2" digital certificate was installed on a laptop. What can cause an "invalid not active" status message? **A.** The user has not clicked the Verify button within the Cisco VPN Client. **B.** On first use, a CA server-supplied passphrase is entered to validate the certificate. **C.** The CA server and laptop PC clocks are out of sync. **D.** A "newly installed" digital certificate does not become active until it is validated by the peer device upon its first usage. **Answer: C** Explanation:

http://www.cisco.com/en/US/docs/security/asa/asa80/configuration/guide/cert_cfg.html
Certificates have a date and time that they become valid and that they expire. When the security appliance enrolls with a CA and gets a certificate, the security appliance checks that the current time is within the valid range for the certificate. If it is outside that range, enrollment fails. Same would apply to communication between ASA and PC

NEW QUESTION: 2 Consider the following steps for a theoretical manual process* Check in input folder for any new files.* If there are no files check again later as files can arrive anytime, and there is no limit to the number of files that may come.* Open the next available file.* Take the first case* Start System X and find the case details.* If the case can't be found., move to the next one.* After finding the case in System X. fetch additional case details from System Y.* Again if the case can't be found, move to the next one.* Analyse all the data to see if System Z should be updated* If the data does not meet the requirements, add notes indicating this to Systems X and Y and move to the next case* If the data does meet the requirements, update the case in System Z* Add notes to Systems X and Y and move to the next case.* At the end of the file, go back and look for another* Stop checking for new files at 16:00 and finish any remaining cases.* When all work is complete create a report of the day's exception cases.* Close down Systems X, Y and Z. If it is possible that there are long intervals between files arriving, what are the alternatives the process should take to control System X, System Y and System Z? (select 2 responses) **A.** Nothing because they will not have been started if no files have arrived yet. **B.** Log out while waiting and log back in when a file arrives. **C.** Stop them from timing out by keeping them active while waiting for files. **D.** Close Y and Z down but keep X open because it is the first application needed to work a case. **E.** Minimise them to keep the desktop clear. **F.** Nothing, just leave them logged in until more work arrives **Answer: B,D**

NEW QUESTION: 3 In the following graphic, the administrator created an additional paging space using smit mkps. The paging space is not active. What is necessary to start using the new paging space? **A.** Vary on the pgvg volume group prior to creating the new paging space. **B.** Use chps with the -a y flag to activate the new paging space for immediate use. **C.** Reboot the server to activate the new paging space. **D.** Use swapon to activate the new paging space. **Answer: D**

NEW QUESTION: 4 Which technology is used to perform predictive accounting for sales orders
