If you just hold a diploma, it is very difficult to find a satisfactory job, Guaranteed Success in C\_TS452\_2022 Exam by using C\_TS452\_2022 Dumps Questions.

**NEW QUESTION: 1** Refer to the exhibit. At the end of an RSTP election process, which access layer switch port will assume the discarding role?  
**A.** Switch3, port fa0/1  
**B.** Swrtch4, port fa0/2  
**C.** Swrtch4, port fa0/11  
**D.** Switch3, port Gi0/2  
**E.** Switch3, port fa0/12  
**F.** Switch3, port Gi0/1  
**Answer: C**  
**Explanation:** Explanation MAC of Switch3 is smaller than that of Switch4) so both ports of Switch3 will be in forwarding state. The alternative port will surely belong to Switch4. Switch4 will need to block one of its ports to avoid a bridging loop between the two switches. But how does Switch4 select its blocked port? Well, the answer is based on the BPDUs it receives from Switch3. A BPDU is superior than another if it has:  
1. A lower Root Bridge ID  
2. A lower path cost to the Root  
3. A lower Sending Bridge ID  
4. A lower Sending Port ID  
These four parameters are examined in order. In this specific case, all the BPDUs sent by Switch3 have the same Root Bridge ID, the same path cost to the Root and the same Sending Bridge ID. The only parameter left to select the best one is the Sending Port ID (Port ID = port priority + port index). In this case the port priorities are equal because they use the default value, so Switch4 will compare port index values, which are unique to each port on the switch, and because Fa0/12 is inferior to Fa0/1, Switch4 will select the port connected with Fa0/1 (of Switch3) as its root port and block the other port -> Port fa0/11 of Switch4 will be blocked (discarding role)

**NEW QUESTION: 2** Which of the following characteristics describe the BPDU Guard feature? (Choose all that apply.)  
**A.** BPDU Guard can be enabled on any switch port.  
**B.** BPDU Guard is used to ensure that superior BPDUs are not received on a switch port.  
**C.** A BPDU Guard port should only be configured on ports with PortFast enabled.  
**D.** A BPDU Guard port receiving a

BPDU will go into err-disable state.**E.** BPDU Guard and PortFast should not be enabled on the same port.**F.** A BPDU Guard port receiving a BPDU will be disabled.**Answer: C,D,F**Explanation: Option A is, obviously, valid, since BPDUGuard is an enhancement of thePortFast feature.D: At the reception of BPDUs, the BPDU guard operation disables the port that has PortFast configured. The BPDU guard transitions the port into errdisable state, and a message appears on the console." Reference:
