NEW QUESTION: 3 DRAG DROP A manufacturer is planning to build a segregated network. There are requirements to segregate development and test infrastructure from production and the need to support multiple entry points into the network depending on the service being accessed. There are also strict rules in place to only permit user access from within the same zone. Currently, the following access requirements have been identified:
1 . Developers have the ability to perform technical validation of development applications.
2 . End users have the ability to access internal web applications.
3 . Third-party vendors have the ability to support applications.
In order to meet segregation and access requirements, drag and drop the appropriate network zone that the user would be accessing and the access mechanism to meet the above criteria. Options may be used once or not at all. All placeholders must be filled.
