**NEW QUESTION: 1**A group policy requires users in an organization to use strong passwords that must be changed every 15 days. Joe and Ann were hired 16 days ago. When Joe logs into the network, he is prompted to change his password; when Ann logs into the network, she is not prompted to change her password. Which of the following BEST explains why Ann is not required to change her password?**A.** Joe's user account was not added to the group policy.**B.** Joe's user account was inadvertently disabled and must be re-created.**C.** Ann's user account has administrator privileges.**D.** Ann's user account was not added to the group policy.**Answer: D****Explanation:**Group policy is used to manage Windows systems in a Windows network domain environment by means of a GroupPolicy Object (GPO). GPO's include a number of settings related to credentials, which includes password expiration.Because Anne was not prompted to change her password, it could only mean that her user account was not added to the group policy.Incorrect Answers:A. Even if Ann's user account has administrator privileges, if it was added to the group policy it would meet the requirements of the group policy.B. If Joe's user account was not added to the group policy, his account would not be required to meet the requirements of the group policy.D. If Joe's user account was inadvertently disabled and must be re-created, he would not be prompted to change his password at logon.References: <https://technet.microsoft.com/en-us/library/dn579255.aspx>

**NEW QUESTION: 2**A "cold" system is placed into a computer center (cooling air/normally approximately 20 C/68" F). With power on, the chip/layer temperature rapidly becomes close to room temperature, because the overall system is not being cooled due to the fact that the "cooling" air is warmer than the "cold" system. In such a scenario, the "warming up" period is probably complete within only 1-2 hours.What are two possible outcomes of this scenario?**A.** intermittent equipment failure**B.** lack of network connectivity after it is booted**C.** inability to power-on the system after it is acclimatized**D.** long-term damage (hair-cracks) on the computer boards**Answer: B,D****Explanation:**Reference: [https://docs.oracle.com/cd/E19658-01/820-6175-12/install\\_pwr\\_on.html](https://docs.oracle.com/cd/E19658-01/820-6175-12/install_pwr_on.html)
