NEW QUESTION: 4DRAG DROPYou are the Office 365 administrator for your company.You have been receiving many unsolicited email messages originating from another country. Many of those messages contain foreign-language content.You need to configure Microsoft Exchange Online Protection to filter messages based on the language content and IP addresses of the country or region of origin.Which filters and options should you configure? To answer, drag the appropriate answer choices to the correct targets. Each answer choice may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.Select and Place:**Answer:** Explanation:Explanation/Reference:Explanation:Content filter settings include selecting the action to take on messages identified as spam, and choosing whether to filter messages written in specific languages, or sent from specific countries or regions.Additionally, you can enable advanced spam filtering options if you want to pursue an aggressive approach to content filtering. Content-filter policy settings are applied to inbound messages only.On the International Spam page you can filter email messages written in specific languages, or sent from specific countries or regions. You can configure up to 86 different languages and 250 different regions.The service will apply the configured action for high confidence spam.References:
