A positive value means that cost is less than planned. What is CV? Cost variance (CV) is a measure of cost performance on a project. The variance notifies if costs are higher than budgeted or lower than budgeted. The cost variance is calculated based on the following formula: $CV = \text{Earned Value (EV)} - \text{Actual Cost (AC)}$ A positive value means that spending is less than budgeted, whereas a negative value indicates that costs are higher than originally planned for the project. Incorrect Answers: A: This result is depicted by viewing the schedule variance (SV), not the CV. B: If the CV is a negative value, it depicts that the costs are higher than planned. C: If the CV is zero, it shows that cost is right on target.
