(Choose all that Apply.)**A.** Before the Apply Operating System image task sequence step, add a step to install Deployment Imaging Servicing and Management (DISM).**B.** Before the Apply Operating System image task sequence step, add a step to install the Windows Automated Installation Kit (Windows AIK).**C.** After the Apply Operating System Image task sequence step, add a step to install software updates offline.**D.** After the installation of the final Application, add an Install Software Updates task sequence step.**E.** After the Apply Operating System Image task sequence step, add a Run Command line step that runs wuaudt.exe /detectnow**Answer: A,D**Explanation:Before the Apply Operating System image task sequence step, add a step to installDeployment Imaging Servicing and Management (DISM).After the installation of the final Application, add an Install Software Updates task sequencestep.
http://blogs.technet.com/b/inside_osd/archive/2011/04/18/configuration-manager-2012-offline-servicing-foroperating-system-images.aspxConfiguration Manager 2012: Offline Servicing for Operating System ImagesIn Configuration Manager 2012 there is a new feature for applying updates to operatingsystem images while they are in the Configuration Manager library. This means anyoperating system image you see in the Operating Systems > Operating Systems Imagesnode from the Software Library wunderbar can be updated with Component BasedServicing (CBS) updates. By updating an image in the Software Library instead of performing a new build and capture of the operating system image you will gain a fewdistinct advantages. You will be able to reduce the risk of vulnerabilities during operatingsystem deployments and reduce the overall operating system deployment to the end user.You will also reduce the administrative effort to maintain your operating system images.The feature is applicable for Component Based Servicing (CBS) updates and for thefollowing operating systems:Microsoft Windows Vista SP2 and laterMicrosoft Windows Server 2008 SP2 and later Microsoft Windows 7 RTMMicrosoft Windows 2008 R2
http://technet.microsoft.com/en-us/library/hh846237.aspxTask Sequence Steps in Configuration ManagerThe following task sequence steps can be added to a System Center 2012 ConfigurationManager task sequence:Install Software UpdatesUse the Install Software Updates task sequence step to install software updates on thedestination computer. The destination computer is not evaluated for applicable softwareupdates until this task sequence step runs. At that time, the destination computer is evaluated for software updates like any other Configuration Manager-managed client. In particular, this step installs only the software updates that are targeted to collections of which the computer is currently a member. This task sequence step runs only in a standard operating system. It does not run in Windows PE. Further information: http://technet.microsoft.com/en-us/library/hh824821.aspxDeployment Image

Servicing and Management (DISM) Technical Reference Deployment Image Servicing and Management (DISM) is a command-line tool that is used to mount and service Windows@ images before deployment. You can use DISM image management commands to mount, and get information about, Windows image (.wim) files or virtual hard disks (VHD) and to capture, split, and otherwise manage .wim files.wuauclt.exe /detectnow The detectnow switch will force a relatively immediate query to the WSUS server to see if there are any updates that are needed. If there are, the yellow shield will appear in the system tray. This is usually pretty quick, within 20-30 seconds.
