Explanation:ExplanationA sysadmin can grant permission to the S3 objects or the buckets to any user or make objects public using the bucket policy and user policy. Both use the JSON-based access policy language. Generally if the user is defining the ACL on the bucket, the objects in the bucket do not inherit it and vice a versa. The bucket policy can be defined at the

bucket level which allows the objects as well as the bucket to be public with a single policy applied to that bucket. In the sample policy the action says "S3:ListBucket" for effect Allow on Resource arn:aws:s3:::cloudacademy. This will make the cloudacademy bucket public.
