NEW QUESTION: 1The initial development of a Project Scope Management plan uses which technique?**A.** Product analysis**B.** Scope decomposition**C.** Expert judgment**D.** Alternatives identification**Answer: C**

NEW QUESTION: 2What is the architectural benefit of keeping WebLogic Server transaction log in the database?**A.** Transaction log in a file system is extremely slow so it cannot be efficiently replicated.**B.** Many transactions in WebLogic are database centric, so keeping log in database makes Two Phase Commit protocol possible.**C.** Oracle does not allow replicating files between data centers, so keeping transaction log in database allows for replication.**D.** It obviates the need to keep in sync two replication technologies (file and database) between data centers. The single replication technology is used for frequently changing data.**Answer: D****Explanation:** Explanation/Reference:You can configure a JDBC TLOG store to persist transaction logs to a database, which provides the following benefits:* Leverages replication and HA characteristics of the underlying database.* Simplifies disaster recovery by allowing the easy synchronization of the state of the database and TLOGs.* Improved Transaction Recovery service migration as the transaction logs to do not need to be migrated (copied) to a new location.* You can configure a JDBC TLOG store to persist transaction logs to a database, which allows you to leverage replication and HA characteristics of the underlying database, simplify disaster recovery, and improve Transaction Recovery service migration.**incorrect: not B: Read-only, One-phase Commit Optimization requires Oracle DB 11.1.0.7.3PSU or above.**

NEW QUESTION: 3Your company has two main offices and 10 branch offices. Each office is configured as a separate Active Directory site. The main offices sites are named Site1 and Site2. Each office connects to Site1 and Site2 by using a WAN link. Each site contains a domain controller that runs Windows Server 2008. You are redesigning the Active Directory infrastructure. You plan to implement domain controllers that run Windows Server 2012 and decommission all of the domain controllers that run Windows Server 2008. You need to

recommend a placement plan for the Windows Server 2012 domain controllers to meet the following requirements: * Ensure that users can log on to the domain if a domain controller or a WAN link fails. * Minimize the number of domain controllers implemented. What should you include in the recommendation? (Each correct answer presents part of the solution. Choose all that apply.) **A.** Read-only domain controllers (RODCs) in the branch office sites **B.** Writable domain controllers in the branch office sites **C.** A writable domain controller in Site2 **D.** A writable domain controller in Site1 **Answer: C, D** Explanation: Writable domain controllers in Site1 and Site2 are enough as we should minimize the number of domain controllers. Incorrect: Not A, not D Writable domain controllers are not needed to authenticate users at the branch offices, as each branch office connects to both Site1 and Site2.
