So far no user fails exam with our current version.

NEW QUESTION: 1You need to recommend a solution to meet the compliance requirements for the Research Department and the statutory Holidays.What should you recommend configuring?(To answer, drag the appropriate object to the correct location in the answer area. Each object may be used once, more than once, or not at all.Additionally, you may need to drag the split bar between panes or scroll to view content.)Select and Place:**Answer:** Explanation: Explanation:Research Department Compliance RequirementBox 1: A Transport Rule Box 2: A MailTipStatutory holiday compliance requirementBox 3: A Transport RuleNote: Scenario:The users in the research department must be able to send email to anyone in the organization, but only the members of a group named Execs must be able to send email to the research users. All other users must be notified that email sent to the research users will remain undelivered. Transport Rule:Using Transport rules, you can look for specific conditions on messages that pass through yourorganization and take action on them.Transport rules let you apply messaging policies to email messages, secure messages, protect messagingsystems, and prevent information leakage.MailTips:MailTips are informative messages displayed to users while they're composing a message.PolicyTips (incorrect):You can help to prevent your organization's Microsoft Outlook email users from inappropriately sending sensitive information by creating data loss prevention (DLP) policies that include Policy Tip notification messages. Similar to MailTips that were introduced in Microsoft Exchange Server 2010, Policy Tip notification messages are displayed to users in Outlook while they are composing an email message. Policy Tip notification messages only show up if something about the sender's email message seems to violate a DLP policy that you have in place and that policy includes a rule to notify the sender when the conditions that you establish are met. Microsoft Exchange Server 2013 analyzes the message, including the list of recipients to which it's addressed, and if it detects a potential problem, it notifies the user with MailTips prior to sending the message. With the help of the information provided by MailTips, senders can adjust the message they're

composing to avoid undesirable situations or non-delivery reports (NDRs). Scenario: Users must be prevented from sending email during an upcoming statutory holiday. Reference: Understanding MailTips; Policy Tips;

NEW QUESTION: 2 DRAG DROP A customer is trying to read data from Node 1 to Node 5 in an Isilon cluster. The two Isilon nodes have the same content in the private caches. Cached data is consistent across both instances. What is the correct sequence of steps that OneFS uses to ensure that all data is consistent across the entire shared cache? **Answer:** Explanation:

Explanation: Reference
