It will clean all obstacles on your way.

NEW QUESTION: 1 Which of the following is NOT a criterion for access control?
A. Role
B. Identity
C. Transactions
D. Keystroke monitoring
Answer: D
Explanation: Keystroke monitoring is associated with the auditing function and not access control. For answer a, the identity of the user is a criterion for access control. The identity must be authenticated as part of the login & authentication process. Answer B refers to role-based access control where access to information is determined by the user's job function or role in the organization. Transactions refer to access control through entering an account number or a transaction number, as may be required for bill payments by telephone, for example.

NEW QUESTION: 2 For this question, refer to the TerraEarth case study. To be compliant with European GDPR regulation, TerraEarth is required to delete data generated from its European customers after a period of 36 months when it contains personal data. In the new architecture, this data will be stored in both Cloud Storage and BigQuery. What should you do?
A. Create a BigQuery time-partitioned table for the European data, and set the partition period to 36 months. For Cloud Storage, use gsutil to create a SetStorageClass to NONE action with an Age condition of 36 months.
B. Create a BigQuery table for the European data, and set the table retention period to 36 months. For Cloud Storage, use gsutil to enable lifecycle management using a DELETE action with an Age condition of 36 months.
C. Create a BigQuery time-partitioned table for the European data, and set the partition expiration period to 36 months. For Cloud Storage, use gsutil to enable lifecycle management using a DELETE action with an Age condition of 36 months.
D. Create a BigQuery table for the European data, and set the table retention period to 36 months. For Cloud Storage, use gsutil to create a SetStorageClass to NONE action when with an Age condition of 36 months.
Answer: D

NEW QUESTION: 3 Which two criteria can an administrator use to determine hosts in a host group? (Select two.)
A. Subnet
B. DNS Domain
C. Application Protocol
D. Network Services
E. Network Adapters
Answer: A, B

NEW QUESTION: 4 Which two statements accurately describe the migration of the ADatum

mailboxes based on the chosen migration method? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. **A.** User accounts in Office 365 must be created before you can perform the migration. **B.** Contact items will migrate automatically. **C.** Calendar items will migrate automatically. **D.** Task items will migrate automatically. **E.** Mailboxes in Office 365 must be created before you can perform the migration. **Answer: A, E**

Explanation: Explanation/Reference: Explanation: From the scenario: The ADatum mailboxes will be migrated to the Exchange Online tenant of Contoso by using the IMAP migration method. You can use IMAP to migrate user email from email systems that support IMAP migration. When you migrate the user's email by using IMAP migration, only the items in the users' inbox or other mail folders are migrated. Contacts, calendar items, and tasks cannot be migrated with IMAP, but they can be by a user. IMAP migration also does not create mailboxes in Office 365. You'll have to create a mailbox for each user before you migrate their email. Incorrect Answers: B, D, E: Contacts, calendar items, and tasks cannot be migrated by using IMAP migration. References: <https://docs.microsoft.com/en-us/Exchange/mailbox-migration/migrating-imap-mailboxes/migrating-imap-mailboxes> Testlet 3 Background Contoso Ltd. manufactures and sells computers and related devices. Employees who work in the corporate headquarters use Microsoft Exchange Server, SharePoint Server, and Office 2016 to perform their daily job functions. Mobile and remote employees access resources in the on-premises environment by using VPN connections. The company plans to transition to Office 365. You purchase Office 365 Business Premium Licenses for all users. Contoso, Ltd. uses System Center 2012 R2 Configuration manager to manage desktop software. Office 365 environment Deployment of all Office 365 applications must be controlled internally by administrators. Users must not have the ability to install Office 365 ProPlus on their own. All user initiated installations of Office 365 applications must be prohibited before administrative deployments are configured. All additional Office 365 licenses must employ the minimum cost to provide the required service. Integration between the on-premises and Office 365 environments must be configured where required. Corporate policies Services must be configured to enforce the following security policies: All VPN connections must be secured by using a 256-bit, L2TP connection. All users must be use multi-factor authentication (MFA) when connecting over a VPN connection. All content, including emails and documents, must be retained for three years after the last modification. Any access to corporate content must require a user to sign in, even if the user is from an external partner organization and is not yet known to the other Office 365 environment. Sharing of credit card information must not be allowed through email, Microsoft OneDrive or SharePoint. All user passwords must be complex and expire every 30 days. Allow Gmail users from partner organizations to automatically open encrypted emails sent from Contoso, Ltd. Client connections All remote client connections to the on-premises environment must use a VPN connection. Internal and external users from partner organizations must be able to dial in to audio conferences by using their own mobile or landline phones. Users must be able to access content in the on-premises SharePoint Server environment seamlessly when connected to the SharePoint Online environment. When users create objects in Office 365 that require a time zone setting, the time zone must always be set to the Eastern Time (US & Canada) setting. Employees Employees must be able to perform the following actions: Access all resources by using their Contoso Active Directory domain user account. Invite users from business partners to participate in meetings. Coordinate scheduling using Microsoft StaffHub. All team settings should be consistent using a one-month schedule. Add users from external partner organizations to teams. File storage You identify the following requirements for file storage: All users must store documents in OneDrive storage. All email attachments to on-premises Exchange Server mailboxes and Exchange Online mailboxes must be saved automatically to OneDrive. Users must be able to share documents from their OneDrive storage with other users including those in other organizations. Users must be notified only when someone else changes a document in their OneDrive. Each user may store up to 50 gigabytes (GB) in OneDrive. Users may request an increase to this limit by using a request process. The process is implemented as a SharePoint form in an on-premises SharePoint site.
