**NEW QUESTION: 1A.** Option B**B.** Option C**C.** Option A**D.** Option D**Answer: B**

**NEW QUESTION: 2**Generally, residential loans are open to prepayment at any time without penalty. To protect against a deficiency, mortgage loans should not exceed the market value of the mortgaged property and in fact are usually made for:**A.** Not less than 70 percent of the value**B.** No more than 90 percent of the value**C.** Not less than 80 percent of the value**D.** No more than 80 percent of the value**Answer: D**

**NEW QUESTION: 3**Which two services must be enabled on the routing servers when configuring Partitioned Intradomain Federation? (Choose two.)**A.** Cisco XCP Router**B.** Cisco XCP Connection Manager**C.** Cisco SIP Proxy**D.** Cisco XCP SIP Federation Connection Manager**E.** Cisco XCP Directory Service**F.** Cisco Presence Engine**Answer: A, C****Explanation:**Configure the Routing NodeFor multi-node chat-only deployments, choose an IM and Presence Service cluster node to act as the routing node. To provide extra capacity for routing, there should be no users assigned to the routing node. The routing node acts as a front-end server, accepting inbound SIP requests from Lync/OCS and routing those requests to the appropriate cluster node that homes the recipient.Note For chat+calling deployments with Lync, and for single-node deployments, you can skip this procedure as there is no need to configure a routing node.ProcedureStep 1 From the Cisco Unified IM and Presence Serviceability user interface, choose Tools > Service Activation.Step 2 From the Server drop-down menu, choose the cluster node that you want to designate as the routing node. The routing node should have no users assigned.Step 3 Check the Cisco SIP Proxy feature service.Step 4 Uncheck the following feature services: Cisco Presence Engine Cisco XCP Text Conference Manager Cisco XCP Web Connection Manager Cisco XCP Connection Manager Cisco XCP SIP Federation Connection Manager Cisco XCP XMPP Federation Connection Manager Cisco XCP Message Archiver Cisco XCP Directory Service Cisco XCP Authentication ServiceStep 5 Click Save.Step 6 Confirm that the Cisco XCP Router network service is running. Because the service is a network service it is running by default, unless you previously disabled it.Choose Tools > Control Center Network Services. From the Server drop-down menu, select the routing node and click Go.If the Cisco XCP Router service is not running, check the corresponding radio button, and click Start
