To examine the content quality and format, free NSE6_FNC-7.2 brain dumps demo are available on our website to be downloaded, To learn our NSE6_FNC-7.2 practice materials, victory is at hand.

If you don't pass the exam, money back guarantee.

NEW QUESTION: 1 To specify the node name for the NAS file server when processing NAS file systems, use the NASNODENAME option on the command line, or place in which file?
A. Include/exclude list
B. Backup copy group
C. Server options file
D. Client options file
Answer: D
Explanation: Use the nasnodename option to identify the NAS file server. Place the nasnodename option in your client system-options file (dsm.sys). The value in the client system-options file is the default, but this value can be overridden on the command line. If the nasnodename option is not specified in the client system-options file, you must specify this option on the command line when processing NAS file systems.
References: https://www.ibm.com/support/knowledgecenter/en/SSEQVQ_8.1.0/client/r_opt_nasnodename.html

NEW QUESTION: 2 Which one of the following options does the established keyword in an ACL entry indicate?
A. Reply packets that belong to an established TCP connection will be permitted if the TCP packet has the ACK or RST bit set.
