With the convenience our HPE7-A08 sure pass vce bring for you, you can spare more time for other things, While our HPE7-A08 study materials can help you eliminate all those worries one by one.

NEW QUESTION: 1What happens when an SNMP status polling request fails while monitoring an HPE ProLiant Gen8 Server?**A.** Alert Aggregation Service posts a warning for the server.**B.** A locked alert state is set by the resource manager**C.** A request is made for the Health Status Array MIB object.**D.** The power state is checked by polling the ILO service**Answer: D**

NEW QUESTION: 2A company has been a victim of multiple volumetric DoS attacks. Packet analysis of the offending traffic shows the following:Which of the following mitigation techniques is MOST effective against the above attack?**A.** The company should implement a network-based sinkhole to drop all traffic coming from192.168.1.1 at their gateway router.**B.** The company should contact the upstream ISP and ask that RFC1918 traffic be dropped.**C.** The company should enable the DoS resource starvation protection feature of the gateway NIPS.**D.** The company should implement the following ACL at their gateway firewall:DENY IP HOST 192.168.1.1 170.43.30.0/24.**Answer: B**

NEW QUESTION: 3Your company uses BigQuery for data warehousing. Over time, many different business units in your company have created 1000+ datasets across hundreds of projects. Your CIO wants you to examine all datasets to find tables that contain an employee_ssn column. You want to minimize effort in performing this task. What should you do?**A.** Write a Cloud Dataflow job that loops through all the projects in your organization and runs a query on INFORMATION_SCHEMA.COLUMNS view to find employee_ssn column.**B.** Go to Data Catalog and search for employee_ssn in the search box.**C.** Write a script that loops through all the projects in your organization and runs a query on INFORMATION_SCHEMA.COLUMNS view to find the employee_ssn column.**D.** Write a shell script that uses the bq command line tool to loop through all the projects in your organization.**Answer: A**

NEW QUESTION: 4Each JCA adapter has a single deployment listed in the WLS Console. Identify two accurate descriptions about managing multiple instances of each adapter in the runtime.**A.** JCA tiles for each adapter instance**B.** One entry per adapter instance in the adapters_config.xml file**C.** Adapter connection factories specified in the WLS Console**D.** Instance configuration in the SOA Suite deployment plan**Answer: B,D**Explanation:*The Oracle Database Adapter is a JCA 1.5 connector, which is deployed to the application server during installation.The Oracle Database Adapter consists of multiple instances; each instance

represents a connection to a database end point. Different SOA processes may point to the same adapter instance (database), while different service endpoints in a SOA process may point to different adapter instances (databases). Because each adapter instance points to a single database, there is a one-to-one correspondence from adapter instances to application server data sources. Out of the box there is a single Oracle Database Adapter instance named eis/DB/SOADemo, which points to the data source jdbc/SOADDataSource. The list of adapter instances is stored in a deployment descriptor file, weblogic-ra.xml on Oracle WebLogic Server. (It is inside of DbAdapter.rar, which contains also the Java class files in DBAdapter.jar). Configuring an Oracle Database Adapter instance is more about creating the underlying data source: getting the correct JDBC driver and connection URL.
