CounterType = PerformanceCounterType.RawBase;B. CounterType = PerformanceCounterType.CounterMultiBase;C. CounterType = PerformanceCounterType.AverageBase;D. CounterType = PerformanceCounterType.SampleBase;Answer: CExplanation: PerformanceCounterType.AverageTimer32 - An average counter that measures the time it takes, on average, to complete a process or operation. Counters of this type display a ratio of the total elapsed time of the sample interval to the number of processes or operations completed during that time. This counter type measures time in ticks of the system clock. Formula:  $((N_1 - N_0) / F) / (B_1 - B_0)$ , where  $N_1$  and  $N_0$  are performance counter readings,  $B_1$  and  $B_0$  are their corresponding AverageBase values, and  $F$  is the number of ticks per second. The value of  $F$  is factored into the equation so that the result can be displayed in seconds. Thus, the

numerator represents the numbers of ticks counted during the last sample interval, F represents the frequency of the ticks, and the denominator represents the number of operations completed during the last sample interval. Counters of this type include PhysicalDisk Avg. Disk sec/Transfer.PerformanceCounterType.AverageBase - A base counter that is used in the calculation of time or count averages, such as AverageTimer32 and AverageCount64.
