NEW QUESTION: 2 Which situation would require using the AIR runtime?
A. Upload a file to a server
B. Connect to external data using the RemoteObject class
C. Drag an image from the operating system into the application
D. Use a Runtime Shared Library (RSL)
Answer: C

NEW QUESTION: 3 George has shared an EC2 AMI created in the US East region from his AWS account with Stefano. George copies the same AMI to the US West region. Can Stefano access the copied AMI of George's account from the US West region?
A. It is not possible to share the AMI with a specific account
B. Yes, since copy AMI copies all private account sharing permissions
C. No, copy AMI does not copy the permission
D. Yes, since copy AMI copies all the permissions attached with the AMI
Answer: C
Explanation: Within EC2, when the user copies an AMI, the new AMI is fully independent of the source AMI; there is no link to the original (source) AMI. AWS does not copy launch the permissions, user-defined tags or the Amazon S3 bucket permissions from the source AMI to the new AMI. Thus, in this case by default Stefano will not have access to the AMI in the US West region.
