**NEW QUESTION: 1** Which of the following would you least expect to form part of the analysis of initial tool costs? 1 credit  
**A.** Evaluation of suitable tools  
**B.** Tool portability  
**C.** Learning time required to use the new tool  
**D.** Integration with other tools  
**Answer: B**  
**Explanation:** Topic 4, Scenario 4, V1 "Test Management Tool" A software development company that sells an established capture-replay tool has decided to complement it with a test management tool. The capture-replay tool was developed over a number of years and is used by a large number of clients. The test management tool will be developed by the same team that developed the capture-replay tool, using the same technology. The company test strategy mandates that structural testing is focussed at the component test level and dynamic non-functional testing is focussed at the acceptance test level. In response to growing customer demand, it is proposed to develop the test management tool in an incremental manner. Each increment will be developed using the V life cycle model. The target platform is a PC in a local area network. The PC uses a proprietary relational database and communicates with a single PC which acts as a server. The test management tool must interface with the company's capture replay tool. Over the first 12 months of the development period the following functionality will be developed for the tool (in two increments): basic requirements management, support for test case creation; support for test procedures, test scripts and test suites. The functionality to be included in later increments will be driven by customer demand: however they expect to provide an incident management system, a web front-end, and interfaces to other proprietary tools and database management systems.

ADatum has a subsidiary named Fabrikam, Inc. that shares the Los Angeles office. ADatum is conducting an initial deployment of Azure services to host new line-of-business applications and is preparing to migrate its existing on-premises workloads to Azure. ADatum uses Microsoft Exchange Online for email. On-Premises Environment The on-premises workloads run on virtual machines hosted in a VMware vSphere 6 infrastructure. All the virtual machines are members of an Active Directory forest named adatum.com and run Windows Server 2016. The New York office has an IP address of 10.0.0.0/16. The Los Angeles office uses an IP address space of 10.10.0.0/16. The offices connect by using a VPN provided by an ISP. Each office has one Azure ExpressRoute circuit that provides access to Azure services and Microsoft Online Services. Routing is implemented by using Microsoft peering. The New York office has a virtual machine named VM1 that has the vSphere console installed. Azure Environment You provision the Azure infrastructure by using the Azure portal. The infrastructure contains the resources shown in the following table. AG1 has two backend pools named Pool11 and Pool12. AG2 has two backend pools named Pool21 and Pool22. Planned Changes ADatum plans to migrate the virtual machines from the New York office to the East US Azure region by using Azure Site Recovery. Infrastructure Requirements ADatum identifies the following infrastructure requirements: \* A new web app named App1 that will access third-parties for credit card processing must be deployed. \* A newly developed API must be implemented as an Azure function named App2. App2 will use a blob storage trigger. App2 must process new blobs immediately. \* The Azure infrastructure and the on-premises infrastructure must be prepared for the migration of the VMware virtual machines to Azure. \* The sizes of the Azure virtual machines that will be used to migrate the on-premises workloads must be identified. \* All migrated and newly deployed Azure virtual machines must be joined to the adatum.com domain. \* AG1 must load balance incoming traffic in the following manner: \* <http://corporate.adatum.com/video/> will be load balanced across Pool11. \* <http://corporate.adatum.com/images/> will be load balanced across Pool12. \* AG2 must load balance incoming traffic in the following manner: \* <http://www.adatum.com> will be load balanced across Pool21. \* <http://www.fabrikam.com> will be load balanced across Pool22. \* ER1 must route traffic between the New York office and the platform as a service (PaaS) services in the East US Azure region, as long as ER1 is available. \* ER2 must route traffic between the Los Angeles office and the PaaS services in the West US region, as long as ER2 is available. \* ER1 and ER2 must be configured to fail over automatically. Application Requirements App2 must be able to connect directly to the private IP addresses of the Azure virtual machines. App2 will be deployed directly to an Azure virtual network. Inbound and outbound communications to App1 must be controlled by using NSGs. Pricing Requirements ADatum identifies the following pricing requirements: \* The cost of App1 and App2 must be minimized. \* The transactional charges of Azure Storage account must be minimized.
